Class II Air Quality Operating Permit Application Form

Facility Name: Click or tap here to enter text.

Existing Facility ID: AClick or tap here to enter text.

Existing Class II AQOP: APClick or tap here to enter text.

Type of Facility: Click or tap here to enter text.

Number of Units (including IA's) in Facility: Click or tap here to enter text.

If a Revision, Number of Units (including IA's) Affected in Action: Click or tap here

to enter text.

Application Type:

□ New AQOP

 \square Revision of Existing AQOP

☐ Renewal of Existing AQOP

Please Submit Application to:

Nevada Division of Environmental Protection Bureau of Air Pollution Control, Class II Permitting Branch 901 South Stewart Street, Suite 4001 Carson City, Nevada 89701-5249 Phone (775) 687-9349

February2021 (Ver. 5)

IMPORTANT INFORMATION

- The Application packet contains:
 - o General Company Information Form
 - Industrial Process Form
 - Combustion Equipment Form
 - o Storage Silo Form
 - Liquid Storage Tanks Form
 - o Insignificant Activities Form
 - Facility-Wide Potential to Emit Table
 - Surface Area Disturbance Form
 - Plant Boundary Coordinates Form
 - o Plant Building Parameters Form
 - o Application Certification Document with Required Attachments
- Please see the Guidance Document for additional instructions on how to complete the application.
- A printed copy of the application must be submitted (mailed or hand delivered), along with an electronic version.
- The application filing fee required by Nevada Administrative Code (NAC) 445B.327 must be submitted with the completed application. Checks must be made payable to the "Nevada State Treasurer, Environmental Protection" with "BAPC" noted in the memo line. Fees may also be submitted electronically at https://epayments.ndep.nv.gov/.
- This application shall be used for new Class II sources, revisions to existing Class II Air Quality Operating Permits, and the renewal of Class II Air Quality Operating Permits. This application packet is <u>not</u> for use for an Administrative Renewal, Administrative Amendment, a general permit, a stand-alone Surface Area Disturbance (SAD) permit, nor for a Request for Change of Location Approval permit for a temporary source.
- An application for a Class II Air Quality Operating Permit must be signed by the Responsible Official, as defined in NAC 445B.156. The certification/signature page is the last page of the application and the original "wet" signature must be provided.
- All items in the application must be addressed. If an item does not apply "N/A" or similar notation must be entered in the appropriate blank. All other information must be provided. Incomplete applications will be returned to the Responsible Official within 10 working days of receipt of the application.
- For the renewal of a Class II Operating Permit, a complete application and corresponding processing fee must be submitted in accordance with NAC 445B.3473, prior to the expiration date of the current permit. The BAPC suggests that the application be submitted well in advance of the timeline outlined in NAC 445B.3473 to ensure the application is deemed complete.
- If the facility applies for a permit that has not previously held a Class I of Class II operating permit, is located within 1,000 feet of a school, hospital, or residential area, or the Director determines that the change to the stationary source results in an increase in allowable emissions that exceeds the thresholds in NAC 445B.3457, the BAPC shall establish a 30-day period for public participation.

GENERAL COMPANY INFORMATION FORM

Briefly describe the permitted facility's process and include the Standard Industrial

1.

SURFACE AREA DISTURBANCE FORM

- 1. Total Acres of the Facility Site: Click or tap here to enter text.
- 2. Total Acres Disturbed: Click or tap here to enter text.

5.

- 3. Add Surface Area Disturbance location as Township(s), Range(s) and Section Click or tap here to enter text.
- 4. NAC 445B.22037 requires fugitive dust to be controlled (regardless of the size or amount of acreage disturbed), and requires an ongoing program, using best practical methods, to prevent particulate matter from becoming airborne. All activities which have the potential to adversely affect the local air quality must implement all appropriate measures to limit controllable emissions. Appropriate measures for dust control may consist of a phased approach to acreage disturbance rather than disturbing the entire area all at once; using wet suppression through such application methods as water trucks or water spray systems to control wind-blown dust; the application of soil binding agents or chemical surfactant to roadways and areas of disturbed soil; as well as the use of wind-break or wind limiting fencing designed to limit wind erosion soils.

If the Surface Area Disturbance is greater than 5 acres, please check each box that applies for Best

Manag	gement Practices (BMPs) used for controlling dust on project's disturbed areas:
	Water trucks
	Graveling/paving of roadway storage areas and staging areas
	Dust palliatives
	Posting and limiting vehicle speeds to 10-15 miles per hour
	Ceasing operations during high wind events
	Fencing or berming to prevent unauthorized access to disturbed areas
	Application of water sprays on material storage piles on a regular basis
	Covering material storage piles with tarpaulin or geo-textiles; tenting
	Use of overhead water spray racks or water hoses
	Track-out controls (graveled entranced, exit area, and street sweeping)
	Landscape preservation and impact avoidance
	Wind fence
	Pre-watering of areas to be disturbed (including all unpaved onsite roads and staging areas)
	Inform all subcontractors (including truck drivers) of their responsibilities for the control of fugitive dust while they are on the project site
	Training of equipment operators to recognize fugitive dust generation and having the authority to shut down operations until water truck arrives and sprays water on the disturbed areas
	Other Applicable BMPs: Click or tap here to enter text.
	Other Applicable BMPs: Click or tap here to enter text.
	If using water trucks, list how many water trucks are used and their capacity in gallons:
	Click or tap here to enter text.

PLEASE NOTE THE FOLLOWING REQUIREMENTS WHICH APPLY TO PERMIT APPLICANTS DURING THE APPLICATION PROCESS:

- A. A permit applicant must submit supplementary facts or corrected information upon discovery [NAC 445B.297(1)(b)].
- B. A permit applicant is required to provide any additional information which the Director requests in writing within the time specified in the Director's request [NAC 445B.297(1)(c)].
- C. Submission of fraudulent data or other information may result in prosecution for an alleged criminal offense [NRS 445B.470].

CERTIFICATION:

I certify that, based on information and belief formed after reasonable inquiry, the statements and information contained in this application are true, accurate and complete.
